Response to Arguments

1. Misnumbered claim 103 (second occurrence) has been renumbered to claim 112.

Applicant's arguments, see Paper No. 14, filed September 25, 2003, with respect to claims 44-56, 59-75, 78-83 and 89-112 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert O'Rourke (Reg. No. 46,972) on January 8, 2004.

2. The abstract has been replaced with the following:

--A method is described that comprises receiving a ringing voltage or tip-ground signal at a first telephone interface. Then, indicating to a control system at an interface that the ringing voltage or tip-ground signal is appearing at the first telephone interface. Then, calling a remote device over a packet data network while maintaining the first telephone interface in an on-hook state. The control system causes the calling in response to the indicating.--

Allowable Subject Matter

3. Claims 44-56, 59-75, 78-83 and 89-112 are allowed.

4. The following is an examiner's statement of reasons for allowance: Regarding claims 44-56, 59-75, 78-83 and 89-112, the prior art of record fails to teach a method of operating a telephone interface control system for communicating with a remote telephone interface over a packet data network comprising indicating that a ringing voltage signal is appearing at a first telephone interface and calling a remote device over a packet data network while maintaining the first telephone interface in an on-hook state. The closest reference, Chang et al. (US 6,118,864) discloses communicating over a packet data network (Figures 1A and 1C) but does not maintain an interface in an on-hook state while calling a remote device over the packet network.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

6. The drawings filed on September 30, 1998, are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
